WORK EXPERIENCE

CRYPTO TRADING

June 2017 - Present

I've been trading since 2017, when I saw the market was gaining traction and still doingit till today. Working with Bitcoin, Ethereum, ZRX, Ripple, Stellar (just to name a few).
I know about the technology behind each of them.

EDUCATION

INFORMATICS @ Lucian Blaga University of Sibiu

2009 – 2012

I was taught about OOP, C++, C#, Java, PHP, SQL among many other technologies over the course of 3 years, with each year learning more advance methods in those fields.

FULL STACK DEV (MERN) @ Strive School

February 2020 – September 2020

I completed an extensive 6 month full-time software development course focused in the MERN stack in July 2021. I've gone from no knowledge of Javascript in February 2021 to building full-stack applications and websites both solo and as a part of team. Alongside the fundamentals of JS, HTML & CSS I now have a great understanding of Typescript, React, Node, Redux, Express, MongoDB, Mongoose, PostgreSQL, Sequelize, JWT security & OAuth.

PROJECTS

ONESTOPSHOP NEXT.JS

August 2020 – September 2020

Deployed on Vercel: LINK
E-commerce website based on Amazon.
In OneStopShop the user can check among different products to find the right one for his/her needs. Payment through Stripe, Paypal or Cash
All code was written by me and can be found on my github.
This Solo Capstone Project was realized for the graduation day
@ Strive School
