This Solo Capstone Project was realized for the graduation day @ Strive.School

Education

Full Stack Developer   **Strive School**   **Feb2021 - Sep2021**

Extensive 6-month Full Stack Developer course focused on the MERN stack.
I've gone from no knowledge of JavaScript in February 2021 to building full-stack
applications and websites both solo and as a part of a team.
Alongside the fundamentals of JS, HTML & CSS I now have a great understanding of
react, node, express, mongodb, mongoose, postgresql, sequelize, JWT security & OAuth.

BSc of informatics   **Lucian Blaga
University of Sibiu**   **2009 - 2012**

I was taught about OOP, C++, C#, Java, PHP, SQL among many other technologies over
the course of 3 years, with each year learning more advance methods in those fields.

Work Experience

Crypto trading   **2017-present**

I've been trading since 2017, when I saw the market was gaining traction and still doing
it till today. Working with Bitcoin, Ethereum, ZRX, Ripple, Stellar (just to name a few).
I know about the technology behind each coin and its uses.
